

Pets need us to make sure they can always find their way home if they are lost.

Here are two ways we can help them:

Blaze is lost and scared. Help him find his way home. Be sure to guide him to the tag and microchip.

**DON'T LOSE
HEART...**

1) **Pet I.D. Tags**

A dog or cat can wear a small metal or plastic tag on its collar. The tag will have his or her name, the owner's address and owner's phone number on it.

2) **Microchips**

As small as a grain of rice, microchips are painlessly placed under a pet's skin. It contains all the information that is found on a pet I.D. tag. If a lost pet is found, a shelter or vet's office can read the microchip with a scanner.
