

Welcome!

The Tortorella Family Foundation staff and friends are excited to share Bear's Angels Humane Education Program for young people. It is the mission of our foundation to provide humane education and literacy tools for children.

The materials in this packet were designed by our team to give fun educational activities to children with the mission to teach responsible and kind care of animals, respect for our environment, and each other.

It is a continuing process for us, as we will develop new resources and ideas. Please visit our website and follow the progress as we continue to work with the community trying to make positive change.

A Bear's Cub Humane Education Certificate is available to print from our website. Included are various stickers and temporary tattoos along with the materials provided in this packet.

On the reverse side, please find instructions as to how children are able to become a Bear's Angel Humane Educator.

Please visit our website: Do Bugs Have Belly Buttons? (www.dobugshavebellybuttons.com) to find more activities. We strive to provide children's books, music, poems and bookmarks teaching important lessons of how we can help animals and our environment.

We hope to work together with parents and educators as we co-create the mindfulness in children and how our choices impact the world around us.

Please join us in our mission.

On behalf of our Tortorella Family Humane Education Team,

THANK YOU and HAVE FUN!

Bear's Angels Humane Education Program *Teaching care and kindness to the young "friends of animals"!*

To Earn a "Cub Humane Education Certificate"

Please complete the **Bookmark lesson** activities and **one** of the **2** projects:

1. Coloring book (ages 7 and under)
