

Sea Turtles

Turtles love to swim and dive in the salty sea.
Turtle friends can play all day, happy as can be.

But when a net is thrown away, it sinks and sinks below.
A turtle can get trapped inside with nowhere she can go!

Careful with your fishing nets when you fish in the sea.
Protect our friends from lines and hooks, so turtles can swim free.

Did you know?

- Sea turtles don't hide inside their shells like other turtles.
- Female sea turtles can lay as many as 100-125 eggs, called clutches.
- Sea turtles have existed since the time of dinosaurs!
